I love my xm radio. I am opposed to HR4026 being passed. I feel there are a sufficient number of residents in town that listen to the local station. Some people can't afford xm radio and some people just don't want it. The local stations in town here do just fine. Also, xm radio will probably only be reporting on the "big" cities. Carroll is a small city with lots of little towns around us. I feel that this area would not be covered on xm radio, that we would have to turn our xm off in order for us to receive weather and traffic announcements. Thank you for your time.
